## SUMMARY:

As a final-semester Computer Science student at BINUS Online University, Fullstack Product Engineer with hands-on experience shipping production features across 5+ client projects. Passionate about scalable systems and product-minded engineering.

## EDUCATIONS:

**Binus Online University** | 2022 - Now | Computer Science | IPK **3.52 / 4.00**

Online Class

**SMK IDN Boarding School** | 2019 - 2022 | Software Engineer

Bogor, Indonesia

- Finalist and **4th** place winner in the Robotic Arm Competition held at Universitas Pancasila.
- Completed a 10 month **internship** as a Flutter Developer at PT. Amanah Karya Indonesia.

## EXPERIENCES:

**Kareem Venture - Product Engineer**

Depok, Indonesia | Mei 2024 - Now

- Handled **5+ software projects** across education, charity, waqf monitoring, warehouse management, and POS systems in a small agile team.
- Communicated directly with clients to define requirements, gather feedback, and validate business needs.
- Developed **Kursi Hikmah**, an online learning platform with **10,000+ registered users** and **2,000 active users during Ramadan**, including paid classes, Midtrans integration, video learning, and quiz features.
- Contributed to **Tarahum.id**, a charity platform with tens of thousands of users and **IDR 10B+ in processed transactions**, by maintaining donation flows, user transactions, and platform reliability.
- Developed **Wakaf Dashboard** to monitor waqf assets, active programs, and valid agreements through a centralized dashboard.
- Worked on **JSR Kids** and **JSR Warehouse**, supporting product management, online sales monitoring, inventory visibility, and revenue dashboards.
- Built and redesigned **Elaf Store**, later migrated into **Kareem POS**, supporting **10+ branches**, around **70,000 orders**, and daily POS operations.
- Maintained core POS features including cashier operations, admin dashboard, stock management, inventory, and order processing with a focus on reliability and scalability.

**PT Anarya Teknologi Indonesia - Flutter Developer**

Jakarta, Indonesia | November 2022 - June 2023

- Developed multiple **Flutter-based internal applications** to support employee workflows, health verification, and field reporting.
- Built a **PCR scanner feature** using **Flutter, GetX/Provider, MVC pattern, and scanner packages** to help employees verify customer PCR data during Covid.
- Created an **illegal parking complaint app** with CRUD functionality, photo capture, and evidence upload features.
- Developed an internal health app to check and update customer **meningitis vaccine status** through QR code scanning.
- Improved operational efficiency by making customer data verification and field reporting faster and easier for employees.

### PT. Inovasi Pintar Indonesia – Intern

Depok, Indonesia | Juni 2022– September 2022

- Developed Bubble-based web applications for travel itinerary planning and mobile-friendly children's storybook reading.
- Contributed to building simple, user-focused digital products using no-code development workflows.

### PT. Merah Putih Sukses Bersama – Intern

Jakarta, Indonesia | Februari 2022– June 2022

- Developed multiple Flutter applications across catering, online training, and hotel booking services.
- Built a recurring catering order feature using geolocation and custom calendar functionality.
- Contributed to an online training app for AKPOL preparation and a hotel booking app connected with partner hotels.

### PT. Amanah Karya Indonesia – Intern

Depok, Indonesia | Januari 2021– September 2021

- Developed **Bisa Kasir**, an online cashier application with features for store management, stock tracking, customer lists, and billing.
- Contributed to building POS-related features to support small business sales and operational workflows.
